

ISO 27018:2020 - Protection of Personally Identifiable Information (PII) in the cloud acting as PII processors

The ISO/IEC 27018:2020 standard is based on the ISO/IEC 27001 standard. The certification of the ISO/IEC 27018:2020 standard helps guarantee that the personal identification data processed by the providers of cloud services is duly protected, with the aim of guaranteeing the privacy of clients.

WHAT ARE THE OBJECTIVES OF THE ISMS ACCORDING TO ISO 27018:2020?

- Identifying risks and applying controls to mitigate them.
- Enhancing data security and data protection for the clients and interested parties
- Protecting information and guaranteeing its security

BENEFITS

- Easy integration with the ISO/IEC 27001 Information Security standard
- Minimising the security risks inherent to personal data
- Building trust in clients by ensuring good management of the data entrusted to your organisation.
- Developing a competitive advantage for the company.
- Improving the efficiency of the organisation.

WHO IS THIS STANDARD FOR?

Any company irrespective of its size or activity that has the ISO 27001:2017 standard and whose main field of activities is related to Cloud services.

WHY APPLUS+ CERTIFICATION?
